Value Stream Mapping Report

Process Name: Optimized Lean Process

Customer: Demanding Customer

Supplier: Lean Supplier

Product: High-Quality Product

Analysis Date: 2025-07-31

Analyst: Lean Expert

Key Metrics Summary

Total Cycle Time:	25.0 minutes
Total Lead Time:	30.0 minutes
Value-Added Time:	25.0 minutes
Process Efficiency:	100.0%
Takt Time:	20.0 minutes
Number of Processes:	2

Executive Summary

This value stream analysis examines the Optimized Lean Process process serving customer Demanding Customer. The analysis identified 2 key process steps with a total cycle time of 25.0 minutes and lead time of 30.0 minutes. The current process efficiency is 100.0%, indicating significant opportunities for improvement through waste elimination and process optimization.

Waste Analysis Summary:
Total identified waste: 0.0 minutes
Primary waste sources:
Improvement potential: 0.0% lead time reduction

Process Details

Process	Cycle Time	Lead Time	Uptime	Operators	Efficiency	Value Added
Lean Process A	10.0 min	12.0 min	98%	1	83.3%	Yes
Lean Process B	15.0 min	18.0 min	97%	1	83.3%	Yes

Waste Analysis

No significant waste identified in current analysis.

Improvement Recommendations
